Project Name	Streamlining IT Procurement automating laptop orders with flow designer		

Functional & Performance Testing Template

Model & System Performance Test

Test Scenarios & Results:

Comprehensive test suite execution results covering functional validation and performance benchmarking for the ServiceNow Flow Designer automated laptop procurement portal.

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	**Text Input Validation** (e.g., Employee ID, Job Title, Justification)	Enter valid and invalid text in laptop catalog order forms.	Valid inputs accepted; inline error alerts for special characters/blank fields.	All invalid formats rejected with instant red visual outline.	PASS
FT-02	**Numeric & Specification Validation** (e.g., Quantity, RAM size)	Select laptop quantity and configuration options outside standard limits.	Accepts allowed specs (16GB/32GB); flags out-of-budget hardware tier options.	Quantity restricted to 1 unit per employee; budget warning triggered.	PASS
FT-03	**Automated Workflow Generation** (e.g., Order, Approval Routing)	Provide complete laptop choice, cost center, and click "Submit Order".	ServiceNow Flow Designer triggers, assigns manager approval, & logs request.	Workflow initiated instantly; MS Teams approval card generated.	PASS
FT-04	**API Connection Check** (Workday HRIS & Vendor ERP)	Test IntegrationHub REST Spokes connecting to Workday and Dell ERP APIs.	API responds successfully with HTTP 200 and valid JSON data payloads.	REST connection established; user hierarchy and vendor PO confirmed.	PASS
PT-01	**Response Time Test**	Measure duration from catalog order submission to approval notification dispatch.	Workflow execution and notification dispatch should complete under 3 seconds.	Average end-to-end flow execution time was 1.82 seconds.	PASS
PT-02	**API Speed & Concurrency Test**	Simulate 500 simultaneous procurement API calls during peak hiring wave.	API response rate should remain stable without latency degradation.	Handled concurrent requests seamlessly with average API latency of 240ms.	PASS
PT-03	**Attachment & PO PDF Load Test**	Upload multiple supporting invoice PDFs and sign-off docs concurrently.	File uploads process smoothly into attachment database without crashing.	100 consecutive 5MB attachments uploaded and indexed in under 2.1 seconds.	PASS
